

PUBLIC NOTICE

Town of Yarmouth

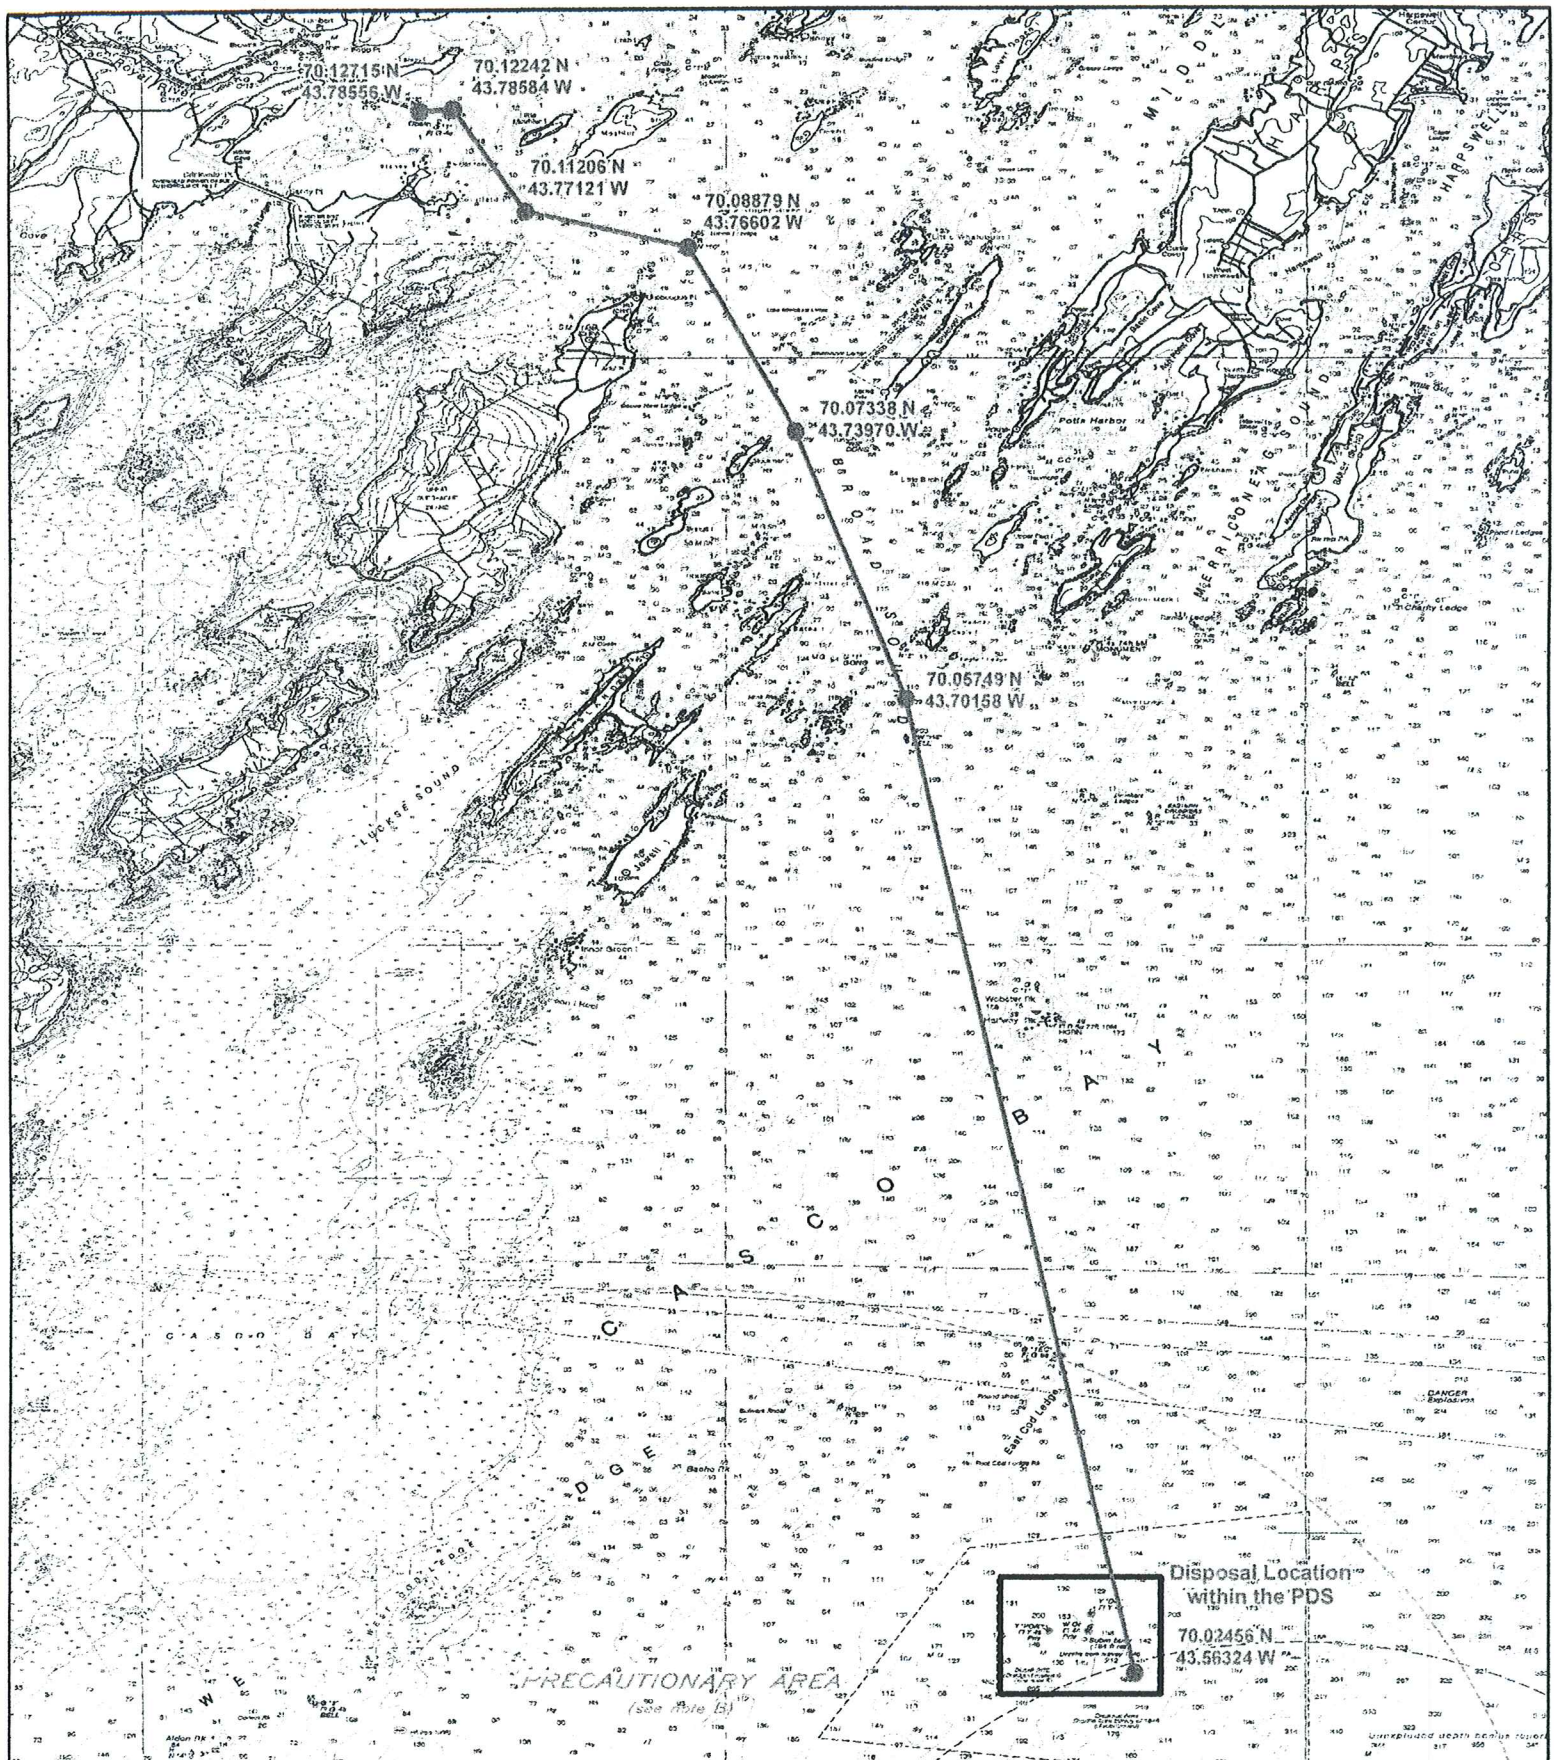

The US Army Corps of Engineers has awarded a contract to dredge the channel and anchorage of the Royal River. Operations will commence around October 1, 2014, and will be completed by April 1, 2015. Sediments will be placed at the Portland Disposal Site located approximately 15 nautical miles from the mouth of the Royal River FNP.

The dredging contractor is being required to use a specific haul route when transiting to and from the dredged material placement site as indicated by the map below or on the following website:
<http://www.nae.usace.army.mil/Missions/ProjectsTopics/RoyalRiver.aspx>.

All fishing gear must be removed 200 feet from either side of the specified haul route centerline to avoid damage to, or loss of, fishing gear during this operation.

For all inquiries, contact Corps Project Manager Michael Walsh at (978) 318-8586.
