

# GET UP TO SPEED!

This summer you voted for better internet.

## Now it's time to take the speed test!

The Maine Broadband Coalition is launching a statewide crowdsourcing data collection effort to demonstrate where there is internet service, who provides it and how fast it is.

A speed test is a way to measure the speed between your device and a server in real-time using your internet connection. In less than a minute, you will see measurements of the download, upload, and latency and ping speeds.

---

We're mapping Maine's internet speed and need your help.

What's your speed?

---

"The more tests that are completed the more useful it will be for communities, companies and the state"

*Peggy Schaffer  
Connect Maine*

### Take the test and learn!

*If you do not have any service at your household or place of work, enter that address into the test while using a local hot spot or using a cellular device.*
